

AZAN ALI

Artificial Intelligence Engineer

• +92 3415123633 • azanaliworks@gmail.com • linkedin.com/in/malikazan • Pakistan

Summary

Artificial Intelligence Engineer and Machine Learning Engineer with strong expertise in developing predictive models, NLP solutions, and scalable AI systems. Skilled in Python and automation tools, with a passion for building intelligent, data-driven solutions that improve performance, enhance decision-making, and reduce manual effort through innovative AI-driven projects.

Education

Air University Bachelor of Science in Artificial Intelligence	Islamabad 09/2023 – 06/2027
F.G. Sir Syed College Intermediate in Computer Science (ICS)	Rawalpindi 11/2021 – 06/2023

Certifications

Deep Learning Specialization — DeepLearning.AI
Developing LLM Applications with LangChain — DataCamp
Retrieval Augmented Generation (RAG) with LangChain — DataCamp
Intermediate Deep Learning with PyTorch — DataCamp
Designing Agentic Systems with LangChain — DataCamp

Key Achievements

🚀 **Innovative NLP Projects** — Developed NLP and ML-driven projects, including a book recommendation system and a TED Talks chatbot, that enhance user interaction and information access.

Skills

Python · NLP · Machine Learning · Deep Learning · Data Science · Natural Language Processing · LLMs · Model Deployment · MLOps (Docker, Git) · Data Analysis

Projects

Semantic Book Recommender

A book recommendation system utilizing NLP techniques to enhance the user experience in discovering books.

- Built an NLP and LLM-powered book recommendation system
- Classified books based on emotional tone and semantic similarity
- Designed a user-friendly Gradio dashboard for interactive book discovery

TedPal: TED Talks Chatbot

A chatbot designed to provide rapid access to TED Talk summaries, enhancing learning and engagement.

- Developed TedPal, a RAG-based chatbot that delivers instant TED Talk summaries
- Eliminated the need to manually search and watch full videos
- Boosted user motivation and learning efficiency through AI-driven summaries

Log Classification System

A classification system aimed at real-time log analysis, leveraging advanced machine learning techniques.

- Designed a hybrid classifier using Regex, Sentence Transformers, and Logistic Regression
- Integrated DeepSeek LLM for enhanced contextual accuracy
- Deployed with FastAPI backend and Streamlit UI for real-time log analysis
